Index

VOLUME 1 (1974) To VOLUME 8 (1981)

CURRICULUM STUDIES OF SCIENCE EDUCATION

BROWN, Sally A. — A review of the meanings of, and arguments for, integrated science. 4 (1977), 31-62.

FRASER, B. J. and WALBERG, H. G. — Psychosocial learning environment in science classrooms: a review of research. 8 (1981), 67-92.

HARDING, J. M., KELLY, P. J. and NICODEMUS, R. B. — The study of curriculum change. 3 (1976), 1-30.

HARTLEY, J. R. — Computer assisted learning in the sciences: some progress and some prospects. 3 (1976), 69-96.

JOHNSTONE, A. H. — Evaluation of chemistry syllabuses in Scotland. 1 (1974), 21-49.

LUCAS, A. M. — Science and environmental education: pious hopes, self praise and disciplinary chauvinism. 7 (1980), 1-26.

POWER, Colin — A critical review of science classroom interaction studies. 4 (1977), 1-30.

STREVENS, Peter — Problems of learning and teaching science through a foreign language. 3 (1976), 55-68.

TAWNEY, D. A. — Evaluation and science curriculum projects in the U.K. 3 (1976), 31-54.

HISTORY, PHILOSOPHY AND SOCIAL STUDIES OF SCIENCE EDUCATION

BROCK, W. H. — From Liebig to Nuffield. A bibliography of the history of science education, 1839-1974. 2 (1975), 67-99.

CAWTHRON, E. R. and ROWELL, J. A. — Epistemology and science education. 5 (1978), 31-59.

HEWARD, C. M.	Industry, cleanliness and godliness. Sources and problems in the history of scientific and technical education and the working classes, 1850-1910. 7 (1980), 87-128.
HOLMES, B.	Science education: cultural borrowing and comparative research. 4 (1977), 83-110.
JENKINS, E. W.	Some sources for the history of science education in the twentieth century, with particular reference to secondary schools. 7 (1980), 27-86.
MACLEOD, R. and MOSELEY, R.	Breadth, depth and excellence. Sources and problems in the history of university science education in England, 1850-1914. 5 (1978), 85-106.
MADDOCK, M. N.	Science education: an anthropological viewpoint. 8 (1981), 1-26.
WILSON, B.	The cultural contexts of science and mathematics education: preparation of a bibliographic guide. 8 (1981), 27-44.
YOUNG, M. F. D.	Notes for a sociology of science education. 1 (1974), 51-60.
SMOLICZ, J. T. and NUNAN, E. E.	The philosophical and sociological foundations of science education 2 (1975), 101-43.

PSYCHOLOGICAL STUDIES OF SCIENCE EDUCATION

BROWN, Sally A.	Cognitive preferences in science: their nature and analysis. 2 (1975), 43-65.
DRIVER, Rosalind and EASLEY, Jack	Pupils and paradigms: a review of literature related to concept development in adolescent science students. 5 (1978), 61-84.
ELIOT, John and HAUPTMAN, Anna	Different dimensions of spatial ability. 8 (1981), 45-66.
ENTWISTLE, N. J. and DUCKWORTH, D.	Choice of science courses in secondary schools: trends and explanations. 4 (1977), 63-82.
GARDNER, P. L.	Attitudes to science: a review. 2 (1975), 1-41.
GAULD, C. F. and HUKINS, A. A.	Scientific attitudes: a review. 7 (1980), 129-161.
HEAD, John	Personality and the pursuit of science. 6 (1979), 23-44.
LOVELL, Kenneth	Intellectual growth and understanding science. 1 (1974), 1-19.
NOVAK, Joseph D.	An alternative to Piagetian psychology for science and mathematics education. 5 (1978), 1-30.

ROWELL, J. A. and DAWSON, C. J. — Skill integration, Piaget and education. 6 (1979), 45-68.

WEST, L. H. T. and FENSHAM, P. J. — Prior knowledge and the learning of science. A review of Ausubel's theory of this process. 1 (1974), 61-81.

WHITE, Richard T. — Achievement, mastery, proficiency, competence. 6 (1979), 1-22.

RESEARCH NOTES

BUTLER, C. C. — The Royal Society and Education. 2 (1975), 145-49.

CHISMAN, Dennis G. — International Council of Associations for Science Education. 2 (1975), 150-53.

DIERKS, Werner — Stoichiometric calculations: known problems and solutions at a chemistry-mathematics interface. 8 (1981), 93-105.

FENSHAM, Peter J. — Preparation for research in science education. 3 (1976), 106-114.

FOSKETT, Joy A. — The N.F.E.R. Register of Educational Research. 4 (1977), 123-126.

HAGGIS, Sheila and ADEY, Philip — A review of integrated science education worldwide. 6 (1979), 69-89.

KARPLUS, Robert — The Lawrence Hall of Science. 5 (1978), 107-110.

KARPLUS, Robert — The intellectual development project at the Lawrence Hall of Science. 5 (1978), 111-113.

KEMPA, R. F. — Science education research: some thoughts and observations. 3 (1976), 97-105.

SCHAEFER, Gerhard — The 'Institut für die Padagogik der Naturwissenschaften' (Institute for Science Education) at Kiel, West Germany. 1 (1974), 83-85.

SHAYER, M. — The analysis of science curricula for Piagetian level of demand. 5 (1978), 115-130.

SJOBERG, Svein — The laboratory for school science at the University of Oslo. 3 (1976), 115-117.

TAMIR, Pinchas — A note on cognitive preferences in science. 4 (1977), 111-121.

TAMIR, Pinchas — Amos De-Shalit Science Teaching Centre in Israel: 1967 to 1977. 4 (1977), 128-131.

WEST, L. H. T. — Science education dissertation in Australian universities, 1974-1979. 7 (1980), 163-168. Also: 2 (1975), 156-159.

WEST, R. W. — The Education (Research) Committee of the Association for Science Education: Roles and Problems. 1 (1974), 86-91.

Theses and dissertations submitted for higher degrees in British Universities.

1971-73	1 (1974), 94-101.
1973-75	3 (1976), 119-129.
1975-76	4 (1977), 132-141.
1976-78	6 (1979), 95-113 and 7 (1980), 168.
1978-80	8 (1981), 106-117.

BOOK REVIEWS

ARCHENHOLD, W. F.	Fundamental issues in science education. 2 (1975), 179-181.
ARCHENHOLD, W. F. WAIN, G. T. and WOOD-ROBINSON, C.	Integrating mathematics and science: co-operation, compromise or conflict? 8 (1981), 119-126.
AYSCOUGH, P. B.	Laboratory teaching in tertiary science. 7 (1980), 179-180.
BLACK, P.J.	Pupils' attitudes to science. 4 (1977), 149-153.
BROCK, W. H.	The knowledge that is of most worth. 7 (1980), 171-177.
BUTLER, C. C.	Four reports from the higher education learning project (HELP). 5 (1978), 137-142.
DAINTON, Sir Frederick	The cat out of the bag. 4 (1976), 143-148.
DAVIES, Graham M. and NISBET, John	Cognitive psychology and curriculum development. 8 (1981), 127-134.
EGGLESTON, James F.	Science education research areas. 6 (1979), 115-119.
ENTWISTLE, Noel J.	Research into tertiary science education. 2 (1975), 182-185.
HAMILTON, David	Integrated science and the politics of innovation. 2 (1975), 174-178.
HARLEN, Wynne	National assessment of scientific attainments. 5 (1978), 143-150.
JENKINS, E. W.	Science education: a structure without foundations? 3 (1976), 138-142.
JEVONS, F. R.	But some kinds of knowledge are more equal than others. 2 (1975), 165-173.
KELLY, Alison	Upon an even pedestal with man. 3 (1976), 131-137.
KERR, J. F.	Cross-national evaluation of science achievement. 2 (1975), 161-164.
MEADOWS, A. J.	Science, religion and education in Britain. 3 (1976), 143-145.

NISBET, John — 50 years of research in science education. 1 (1974), 103-107.

RAVETZ, J. R. — The poverty of logicism. 1 (1974), 108-109.

SKLAIR, Leslie — Social problems of scientific communication. 5 (1978), 133-136.

WOOD-ROBINSON, C. — More effective biology teaching. 1 (1974), 110-111.
